

#11 Connect

Elite Club #38 October 2018

Coming Soon to FNTG Connect!

A new look will soon be implemented to the [FNTG Connect](#) "Client" page! The page will be pared down to show only relevant information. We are adding new filters to search for specific clients, specific referrals, referrals with status back alerts, etc.

Status alerts for referrals made from FNTG Connect!

What is a status alert? After a referral is made from Connect to a solution provider, do you know what activities have taken place? Do you know the process of looking for the status updates? Do you want to know when a client has converted from a demo user for the solution to a paying customer? Do you want to know what type of engagement takes place after the client becomes a paying customer?

We are in the process of building a feature that will alert our FNTG Connect users when a referred client has converted to a paying user. It will let the Connect users know how much engagement he/she has with the solution. As we're building these new features for you, we'd also like to hear *from* you! Do you have suggestions on how you would like to see this information displayed in your Connect site? Please email fntgconnect@fnf.com with your ideas and input!

Contact your FNTG Connect Representative with any questions!
